

The DSA-1004 is a dual 1x4 DS3 distribution amplifier (DA). It is used in i-MOD platform. The module provides dual-channel DA with 4 DS3 outputs for 1 DS3 input on each channel. The first output supports power-off protection. Thus signal can be output continuously when module is removed or power is off.

The DSA-1004 can be controlled locally by means of an intuitive card-edge interface or remotely using i-MOD platform control software IM-MASTER.

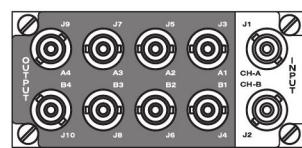

FEATURES

- Dual 1x4 distribution mode
- Bandwidth up to 30 MHz
- The first output is power-off protected
- Non-volatile memory
- Hot-swappable
- IM-MASTER control supported

SPECIFICATIONS

Specifications are subject to change without notice.

INPUT

Signal Format.....	DS3
Connector.....	BNC, $75\Omega \pm 5\%$
Data Rate.....	44.736 Mbps ± 895 bps
Single Amplitude Value.....	0.36 ~ 0.85 V
P & N Pulse Ratio.....	0.9 ~ 1.10

OUTPUT

Signal Format.....	DS3
Connector.....	BNC, $75\Omega \pm 5\%$
Data Rate.....	44.736 Mbps ± 895 bps

Single Amplitude Value.....0.5 V ± 0.1 V

P & N Pulse Ratio.....0.9 ~ 1.10

ELECTRICAL

Power.....	± 12 V DC power inputs
Power Consumption.....	2 W

ENVIRONMENTAL

Operating Temperature.....	32° ~ 104° F (0° ~ 40° C)
Relative Humidity.....	10% ~ 90%
